WE'RE IN! ARE YOU?

A call to all Adults

On Friday, September 20 - three days before the UN Climate Change Conference in New York - a climate strike is taking place all over the world.

Greta Thunberg and many other people have called for adults to take to the streets on this day.

Together and immediately

Only if we act together and immediately can we stop global warming and the mass extinction of animal and plant species. The dangers are unprecedented. Unprecedented are the required measures. The climate protection movement must also be unprecedented.

Political failures

Millions of young people have opened the eyes of politicians, especially among 'Fridays for Future': Climate protection must no longer be delayed. But instead of specific and effective measures, there have been only empty promises.

The consequences of the climate crisis are visible.

Economy as a brake?

Politicians repeatedly justify their misguided climate policy with reference to the economy. But have you, as an entrepreneur, asked politicians to step on the brakes?

Consistent climate policy

We now need companies to publicly confess and explain: We have long been ready for a consistent climate policy! Complete climate neutrality! We will pave the way!

How can companies take part in the strike?

- » Close your gates, offices or shop doors on 20 September - all day, a few hours or at least symbolically at noon.
- » Support your employees when they take part in strikes with generous working hours.
- » Display flyers and posters, communicate your participation internally and in public with #AlleFürsKlima.
- » Add your name on the allefürsklima.de site under "Kooperation".
